

Guillaume Le Roux

Computer Engineer

Description

I am currently looking for an experience in a foreign country in order to discover and learn about new cultures.

After two years of experience as Full Stack-Web developer, in Smile Open Source Solutions, I am looking for a job as back-end or fullstack developer

Experience

03/17 - Now **Software Engineer**

[Smile Open Source Solutions](#)

Since I have graduated I have been working for Smile, first european open source integrator. With Smile i have worked for different clients :

Trigano : First french constructor of camping cars and caravans

In a team of three we made the front of their intranet using ReactJs and consuming API's

Elephorm : They produce and sell online lessons on various topics
Initiated the rework of their website for four months in Symfony.

In a team of four developpers in an agil process, we set up a stack of continuous development with a Jenkins, we used code reviews and different quality tools to have quality measures.

Suez : A world leader in sustainable resource management

I made a prove of concept for a Progressive Web App with a front in ReactJs and a Back in Go

For this POC i was in autonomy with a direct relation with the client

Axelliance : Second french broker wholesaler in insurance

In a team of four developpers we were in charge of developping and launching new websites and existing park maintenance
we had to work and interact with other teams, product owners in an agile process

Breton, level B2 ★★★★★

Education

2014 - 2017 **Master's Degree in Computer Engineering**

[Université Rennes 1 - France](#)

Main subjects : Algorithms, Object Oriented Programming, Design patterns.
During this graduation we had to do several projects using different languages such as a text Editor in Java, client/server music streaming in C, an asteroid game in OCaml

2011 - 2014 **Bachelor's degree**

in Applied Mathematics and Social Sciences

[Université Rennes 2 - France](#)

Main subjects: Mathematics such as alegebra, probabilitys, statistics and enonomy.

Hobbies

Sailing as skipper

As skipper i was in charge of a crew of three to five sailor, i had to face different unforeseen events such as strom, breakdown. I was also in charge and i have to explain and assign task to the crew and coordinate all of them.

Sports, Handball in club

I have been playing Handball for now ten years, I had to be here to help the club the week ends to organisate the games of the younger teams
