Description

Hello, I'm looking for a job as Back-end developper

Experience

03/17 - Now **Software Engineer** Smile Open Source Solutions
For Smile I have mainly worked for four differents customer :
Trigano : In a team of three we made the front of their intranet using ReactJs and consuming API's
Elephorm : Initiated the rework of their website for four month in Symfony.
In a team of four developper in an agil process, we set up a stack of continuous development with a Jenkins, we used code review and differents qualtity tools to have quality reference.
Suez : I made a POC for a Progressive Web App with a front in ReactJs and a Back in Go
For this POC i was in autonomy with a direct relation with the customer
Axelliance : In a team of four developper we were in charge of developping and launching new website and existing park maintenance
we had to work with a product owner who create the specifications in an agile process

Education

2014 - 2017 **Master's Degree in Computer Engineering** Université Rennes 1 - France
Main subjects : Algorithms, Object Oriented Programming, Design paterns.
During this graduation we had to do several projects using differents languages
such as a text Editor in Java, client/server music streaming in C, an asteroid game in OCaml, ...

2011 - 2014 **Bachelor's degree**
in Applied Mathematics ans Social Sciences Université Rennes 2 - France
Main subjects: Mathematics such as aglebra, probabilitys, statistics and enconomy.

Febuary 20th, 2019

Guillaume Le Roux
